ARMI | MBH  
ANALYTICAL LTD

## LGC and MBH

In December 2018 MBH became a member of the LGC family alongside the ARMI brand of Reference Materials. We are now also able to offer direct access to the extensive ARMI range. Please see the ARMI/LGC catalogue also on our website for additional Reference Materials.

## Setting Up & Check Samples

<u>Setting Up Samples</u>		Pages	<u>Setting Up &amp; Check Samples</u>		Pages
Section 16	16.1 Cast Irons	2	Section 16	16.7 Nickel	8
	16.2 Low-Alloy Steels	2-3		16.8 Lead	9
	16.3 High-Alloy Steels	3-4		16.9 Zinc	10
	16.4.1 Pure Aluminium	5		16.10 Titanium	10
	16.4.2 Low-Alloy Aluminium	5		16.11 Tin	10
	16.4.3 High-Alloy Aluminium	5-6		16.12 Cobalt	11
	16.5.1 Copper with Impurities	7	Section 16B	16.20 Cast Iron & Steel Check Samples	11
	16.5.2 Low-Alloy Copper	7		16.40 Aluminium Check Samples	11
	16.5.3 High-Alloy Copper	7		16.60 Magnesium Check Samples	11
	16.6 Magnesium	8		16.11 Tin Check Samples	11

This catalogue is not the full listing of the materials supplied by ARMI/MBH but only those setting up samples currently supplied by ARMI/MBH. Please also see our other catalogues.

On the following pages you will find the current range of setting up samples for optical emission spectroscopy (OES), supplied by ARMI/MBH. The range includes Setting Up Samples for both ferrous and non-ferrous alloys and sourced from several producers. These are offered here from ARMI/MBH for your convenience.

The format of the catalogue has followed the same conventions we use in our full Reference Materials catalogue. Whilst every effort has been made to detail the latest information, it is possible that products will be remade or replaced and values and dimensions changed. This catalogue can therefore only be a snapshot of the information available at the time of publication. These materials are not classified as Certified Reference Materials and therefore are often supplied with only a datasheet to present the compositional values.

A separate price list is available upon request. Please be aware that the producers may change availability and prices without notice. Please ask for our confirmation or quotation of the current prices before placing your order.

If you cannot find the catalogue reference number you want listed it may have been changed, deleted or excluded because of its age or availability. Please enquire, and we will investigate to see if it can be supplied.

**These materials are classified as Setting-Up Samples or Check Samples only. For materials to Reference or Certified Reference Material grade please see our other catalogues.**

## Information

### Abbreviations

( )	The concentration value stated within the brackets is not certified and is provided for information purposes only
R.E.	Rare Earth
ppm	Parts per Million (w/w)

### Form

C	Material is a <b>Cast</b> product
CC or (2xCC)	Material is <b>Chill Cast</b> product or ( <b>Double Chill Cast</b> )
HIP	Material is <b>Hot Isostatically Pressed</b> powder
SC	Material is a <b>Spray Cast</b> product
W	Material is a <b>Wrought</b> product
R	Material has been cut from <b>Rolled</b> strip

All compositional values stated herein are approximate and will vary from melt to melt. Each piece is supplied with datasheet/certificate giving values for the melt supplied.

Material listed in previous editions but now no longer listed herein should be considered no longer available and are not likely to be remade.

## 16. Setting Up Samples

Blocks / Discs

Updated May 2019

All of these samples have been prepared to meet the daily setting up requirements of laboratories using Direct Reading Spectrometers.

Analytical Data are supplied with each sample but are not certified as accurate as these are not intended to be used as Primary Reference Materials, and should not be used for calibration..

## Definitions

The materials found in this ARMI/MBH catalogue have been categorised as Setting Up Samples and Check or Control Samples.

The following definitions used in ISO Guide 30: 2015 apply to the materials supplied by MBH Analytical Ltd.:

Certified Reference Material	"reference material (RM) characterized by a metrologically valid procedure for one or more specified properties, accompanied by an RM certificate that provides the value of the specified property, its associated uncertainty, and a statement of metrological traceability".
Reference Material	"material, sufficiently homogeneous and stable with respect to one or more specified properties, which has been established to be fit for its intended use in a measurement process".
<b>Setting Up Samples</b>	Samples which have been prepared to meet the routine setting up requirements of laboratories using direct reading spectrometers. Whilst analytical data are supplied with each sample they are not certified and are only intended to be used as Setting Up Samples.
<b>Check/Control Samples</b>	Similar to Setting Up Sample (see above) but usually of a composition close to the 'working' composition of the users own product, and for regular checking of the operational or working range of the customers spectrometer.

## Use of Reference Materials

Whilst modern instrumental methods of analysis are capable of high accuracy and precision, they are comparative techniques.

Setting Up Samples should be selected and used correctly for optimum performance to be achieved, and the following point should be considered;

The instrument manufacturer's recommendations and advice should be sought/ followed.

Users should be aware of the possible effects of structure, sample preparation and physico-chemical interferences when using these materials.

## Validity of Information

### **IMPORTANT - Please Note**

The majority of the analytical data in the preceding pages indicate actual values for the batch currently available. However some materials may be remade during the lifetime of this catalogue and the values achieved for the replacements may differ from those stated.

We recommend that customers verify the availability of any material where it is important that the material supplied has the element concentration values listed.

**All concentration values in this catalogue are given in % (w/w) unless otherwise stated.**

All stated dimensions and weights are approximate. Finished sizes/weights and composition may differ from those stated.

Whilst every effort is taken to present accurate data, errors and omissions excepted, it remains the responsibility of the purchaser to verify data prior to purchase and use.

# **Conditions of Sale & Ordering Procedure.**

August 2019

## **General Conditions**

All materials are subject to our general Conditions of Sale. Copy available upon request.

- 1 All items listed in this catalogue or otherwise offered for sale are subject to availability and any delivery dates that may be quoted are conditional on supplies. We are unable to accept liability for delay and if any item becomes unavailable during the life of a catalogue we will advise on suitable alternatives where appropriate.
- 2 Unless credit facilities have been agreed with us (in which case payment is due on a net monthly basis), payment for items is due against a Pro Forma invoice at the time of ordering
- 3 We draw the attention of all customers to the notes in our catalogue relating to definitions, analyses and calibration procedures.
- 4 To the extent that the law may permit, the following condition stands in substitution for all conditions and warranties as to merchantability and fitness for purpose as implied by statute, common law or otherwise.
  - a. It is the responsibility of the customer to decide on the suitability and fitness for purpose of all items purchased
  - b. Any items claimed to be defective must be returned to us (within 3 months of delivery) for examination and analysis. No claims can be entertained if this is not done.
  - c. We may, at our discretion, replace any item shown to be defective or refund the price paid. Our liability in respect of any such item will not in any circumstances exceed the amount paid for the item in question and no liability is accepted for consequential losses however arising.
- 5 These conditions shall apply to all contracts entered into by us to the exclusion of all other conditions and notwithstanding any items that may appear on any printed stationery of any customer. No variation of these conditions shall be effective unless confirmed by us in writing on or prior to formal acceptance by us of any order.
- 6 Until such a time as we have received full payment, items supplied to customers shall remain our property notwithstanding delivery to the customer and we shall be entitled to enter upon the customer's premises to recover the property if the customer shall go into liquidation, or if a receiver is appointed .

## **Ordering Procedure**

Orders are accepted by e-mail, or post. Please ensure any subsequent confirmation of an order is appropriately marked so as to avoid duplication.

Send your order to:           **ARMI/MBH (an LGC Standards Company)**           Tel:           **++1 603 935 4100**  
  **276 Abby Road,**  
  **Manchester,**  
  **NH 03103,**  
  **USA**

  Email:           [armi@lqcgroup.com](mailto:armi@lqcgroup.com)

Orders placed shall include:      Catalogue number, quantity required, description, price, agreed discount and confirmation of invoicing and delivery address.  
  Unless specifically instructed all orders will be despatched by our chosen carrier, with due regard to speed, security and cost.

**All orders will be acknowledged by either e-mail or post. Please check the acknowledgement upon receipt to ensure we have correctly understood your requirement.**
